

## TRACKED EXCAVATOR | JS300 LC/NLC

Net engine power: 180 kW (241 hp) Bucket capacity: 0.86 – 1.93 m<sup>3</sup> Operating weight: 31 140 – 32 687 kg

**JCB**

## DURABILITY AND RELIABILITY.

BEFORE YOU BUY AN EXCAVATOR, YOU NEED TO KNOW IT'S GOING TO BE TOUGH ENOUGH TO PERFORM ANY JOB YOU ASK OF IT. FORTUNATELY, WITH A JCB JS300, STRENGTH AND DURABILITY COME AS STANDARD.

1

2

### Boom and dipper.

- 1 A JCB JS300 reinforced boom and dipper is made of high tensile strength steel, with internal baffle plates for long life durability. In addition we fit heavy-duty wear strips at the dipper end for increased durability.
- 2 Our advanced manufacturing and assembly processes produce high precision and quality assembled components.

### Componentry.

- 3 JCB JS300 boast the best components in the industry, including Berco running gear, Kawasaki pumps and Kayaba main control valves.  
  
The MTU 6-cylinder 180 kW engine uses a multi-stage fuel filtration system. This consists of a remote primary filter with built in water separator and secondary engine mounted filter. This system protects against a wide range of types of contaminants in fuel. A fuel shut off tap is fitted as standard along with a self priming lift pump for easy and simple servicing.

On the upper structure, there is a large storage space available to store chains and other essential accessories. We have added a new cover over the washer fluid bottle to maximise usable space.

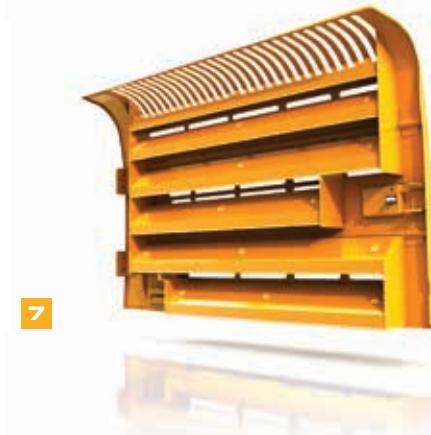

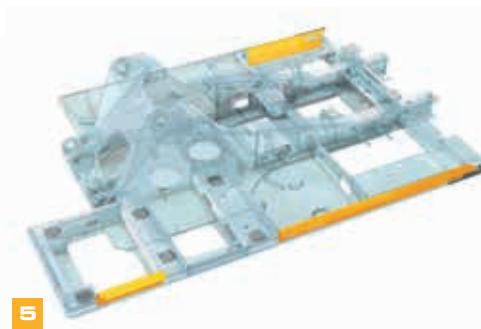

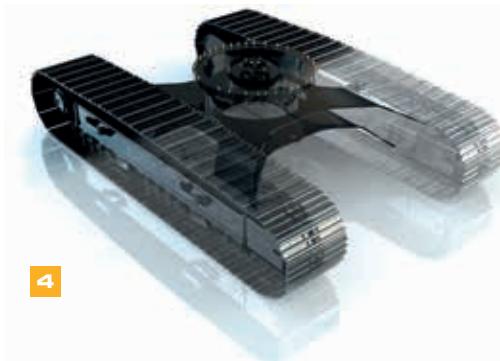

We use Finite Element Analysis with extensive rig and endurance testing to make key components last longer.

3

**Structural strength.**

- 4** The high-strength undercarriage of a JCB JS300 uses a fully-welded X frame construction for long-term durability even in the most demanding applications.
- 5** A closed box section revolving frame increases strength and reduces stress. It is also highly resistant to impact damage.
- 6** The JS300's high-strength rigid upper frame provides maximum durability and support.
- 7** Our stiff, durable door design gives great strength and rigidity.

# MAXIMUM PRODUCTIVITY, MINIMUM SPEND.

IT'S MORE IMPORTANT THAN EVER TO SAVE MONEY AND TIME; THE JCB JS300 RANGE IS DESIGNED TO MAKE THE MOST OF BOTH.

## Upping output.

- 1 With up to a massive 247 kNm of bucket tearout and fast cycle times, the JS300 is extremely productive in all applications
- 2 Simultaneous tracking and excavating is smooth and fast with an intuitive multifunction operation.

3

## Efficiency.

Advanced hydraulic technology ensures that the machines always starts in idle for maximum fuel efficiency, contributing to fuel savings.

- 3 The MTU 6R1000 7.7-litre engine produces a formidable 180 kW of power and 1000 Nm of torque, and works in harmony with the SMART control electronics to deliver smooth high torque power even at low RPM.

An electric fan clutch automatically adjusts the fan speed based on the cooling demands. This reduces both noise and fuel consumption.

1

2

3

3

## Stability, hydraulics and attachments.

**4** JCB's innovative hydraulic regeneration system means oil is recycled across the cylinders for faster cycle times and reduced fuel consumption.

**5** A JCB JS300 has cushioned boom and dipper ends to prevent shock loadings, protect your machine and increase operator comfort.

JCB SMART Control gives access to variable working modes. The manually selectable High Plus mode offers great efficiency, with 5% gains over outgoing models.

For ultra versatility, JCB offers a full list of auxiliary pipework options including hammer, auxiliary, merged and low flow.

# A COMFORTABLE FAVOURITE.

JCB EXCAVATORS ARE DESIGNED AROUND THE OPERATOR. THAT'S GOOD FOR THEM BUT EVEN BETTER FOR YOU; AFTER ALL, GREAT COMFORT AND EASE OF USE EQUALS GREAT PRODUCTIVITY.

## Visibly better.

- 1 A 70/30 front screen split gives JCB JS300s excellent front visibility. A clear view of the front right track provides easy, safe trench digging and manoeuvring.
- 2 An innovative low-level bonnet provides excellent rearward visibility.

## Comfortably in control.

- 3 The 7" colour multi-function display is easy to read in all light conditions, provides instant operational information, and has a customisable home screen.

JCB's new basic tool select system (fitted as standard) allows the operator to set up the single direction auxiliary and hammer circuit to match flow the requirements. The selected flow is achieved by automatically adjusting the engine rpm when the hydraulic service is operated.

You can easily check your JS300's DEF usage and level via the in-cab LCD monitor, which also warns you if you're running low.

## The working environment.

**4** The JS300 creates a quieter working environment inside and out. Therefore, you can use the machine at any location, any time.

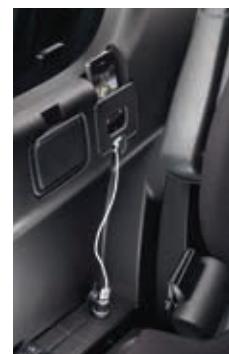

Our cabs use 6 viscous rubber mounts to minimise noise and vibration.

**5** JCB's climate control has been fully revised and is now standard, and offers a precisely controlled cab temperature with fresh or recirculated air. Demisting/defrosting functions keep the front window clear.

**6** There's a spacious luggage tray behind the operator's seat.

A large floor area with large high grip pedals gives easy and precise tracking.

The Plus Pack is available as an option, and delivers a variety of enhancements to improve the operator experience.

The JS300's cab and controls are independently adjustable so that it's easy to find the perfect operating position.

We offer tailored seating options to suit many different applications.

# LESS SERVICING, MORE SERVICE.

WE'VE DESIGNED JCB JS300 TO BE LOW MAINTENANCE AND EASILY SERVICEABLE. WHICH MAKES THEM AFFORDABLE, EFFICIENT AND HIGHLY PRODUCTIVE. HELPING YOU GET THE BEST SERVICE FROM YOUR MACHINE.

## Easy does it.

**1** The air filter on a JS300 is easily accessible, and a double-element construction simplifies cleaning. The latest Powercore air filter is fitted as standard, so cleaning intervals are longer than ever.

**2** The filters on a JCB JS300 (engine oil, hydraulic oil and fuel) are centrally located for fast, easy servicing. By reducing the number of fuel filters from three to two, we've cut the amount of routine maintenance you need to do on your excavator.

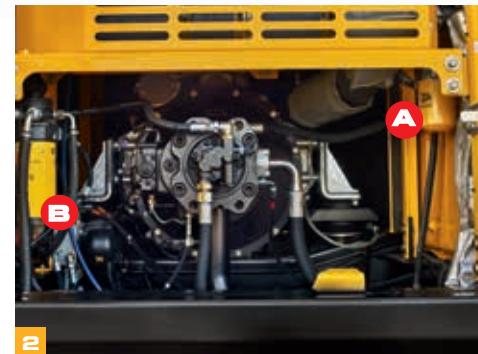

Unlike many Tier 4 Final excavators, JCB JS300s don't require a diesel particulate filter (DPF). This eliminates the need for costly servicing or replacement of the filter. No filter also means no regeneration cycles, preventing any productivity constraints.

Filling your JS300 with DEF fluid is easily accessed via the upper structure. You can also access all main DEF components from there too.

Because worksites get dirty, we've equipped these excavators with a new and improved easy-to-clean-toolbox.

By using graphite impregnated bronze bushes, we've reduced the JS300's boom and dipper greasing intervals to 1000 hours for normal applications.

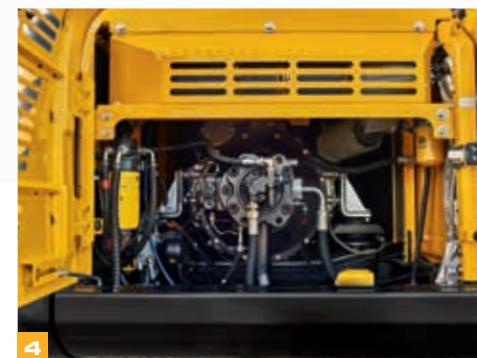

(A) Hydraulics oil filters (B) Fuel filters

## SERVICE INTERVALS

Engine oil and oil filter	Every <b>500</b> hours
Hydraulic oil	Every <b>5000</b> hours
Hydraulic oil filter	Every <b>1000</b> hours

**Here to help.**

- 3** JCB's Smart Control automatically checks the engine oil and engine coolant level on machine start up.
- 4** Because they're mounted side by side on a JCB JS300, the engine radiator, hydraulic cooler and intercooler can be serviced individually yet cleaned easily.
- 5** Service your JCB JS300 with your local main dealer and our trained engineers can minimise downtime. Order genuine JCB parts online and, in 95% of cases, they'll be with you next day. For extra security and machine protection, opt for a package like JCB LiveLink remote machine monitoring.

# THE SAFE CHOICE.

ON-SITE SAFETY IS CRUCIAL, SO WE'VE DESIGNED THE JS300 TO INCORPORATE AS MANY CUTTING EDGE SAFEGUARDS AS POSSIBLE. IN SHORT, YOUR OPERATORS ARE IN SAFE HANDS.

1 The JCB JS300 bonnet opens front-to-rear for easy and safe engine service access. To make operator access safer, we've installed a tread plate over the engine.

A fuel shut-off tap provides a quick, safe way to change fuel filters and reduce the risk of spillage and contamination.

2 For extra peace of mind, JCB JS300 cabs are available with an optional external ROPS and FOPS protection.

3 JCB's Safety Lever Lock fully isolates hydraulic functions to avoid unintended movements. Our 2GO system means a JCB JS300 can only be started in a safe locked position via two separate inputs.

4 JCB JS300s have a large glass area and low bonnet line for superb visibility.

5 A JCB JS300's steps and platforms have anti-slip punched steel plates for optimum grip, even in wet or icy conditions. Bolt-on plates have recessed bolts to reduce trip hazard. We've also reconfigured the step arrangement so there's now a handy extra toolbox for secure storage.

**6** A standard rear view camera displays uninterrupted rearward views on the smart controller display.

**7** Our JS300 comes equipped with a full set of side and rear view mirrors as standard, providing all round visibility and safety compliance.

To reduce the risk of costly mistakes, we've made DEF and diesel tanks very distinct on the new JS300. They're coloured and named differently, opened by different keys, and have different-sized nozzles so you can't accidentally put diesel in the DEF tank.

Our factory-fit immobilisers can reduce your insurance premiums. Featuring automatic arming after a set time following engine shutdown.

JCB LiveLink telematics technology provides you with essential reports on everything from vehicle usage to fuel economy, idle time and engine load data.

# LIVELINK, WORK SMARTER.

**LIVELINK IS AN INNOVATIVE SOFTWARE SYSTEM THAT LETS YOU MANAGE JCB MACHINES REMOTELY – ONLINE, BY EMAIL OR BY MOBILE PHONE. ACCESS EVERYTHING FROM MACHINE ALERTS TO FUEL REPORTS AND HISTORY INFORMATION, WITH ALL DATA STORED AT A SECURE CENTRE.**

## Productivity and cost benefits

By providing information like idle time monitoring and machine fuel consumption, JCB LiveLink helps reduce your fuel usage, saving money and improving productivity. Machine location information can help improve efficiency and perhaps even reduce insurance costs.

## Maintenance benefits

Manage machine maintenance easily – accurate hours monitoring and service alerts improve maintenance planning, while real-time location data helps you manage your fleet. Critical machine alerts and maintenance history records are also available.

## Security benefits

LiveLink's real-time geofencing alerts tell you when machines move out of predetermined zones, and real-time curfew alerts inform you of unauthorised usage. Further benefits include real-time location information, advanced ECU matching (pairs LiveLink with the immobiliser or ECU).

# VALUE ADDED.

JCB'S WORLDWIDE CUSTOMER SUPPORT IS FIRST CLASS. WHATEVER YOU NEED AND WHEREVER YOU ARE, WE'LL BE AVAILABLE QUICKLY AND EFFICIENTLY TO HELP MAKE SURE YOUR MACHINERY IS PERFORMING TO ITS FULL POTENTIAL.

1

2

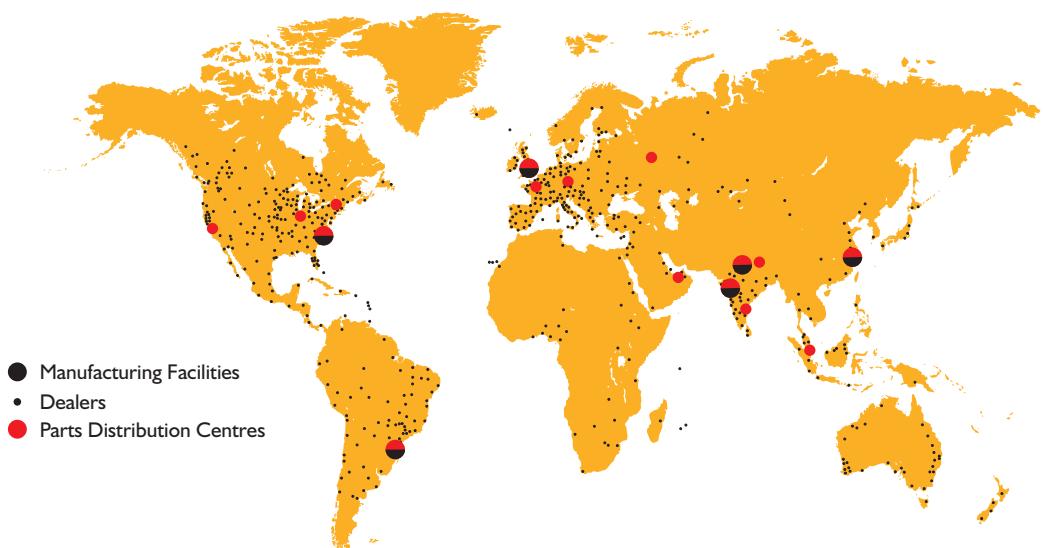

3

1 Our Technical Support Service provides instant access to factory expertise, day or night, while our Finance and Insurance teams are always on hand to provide fast, flexible, competitive quotes.

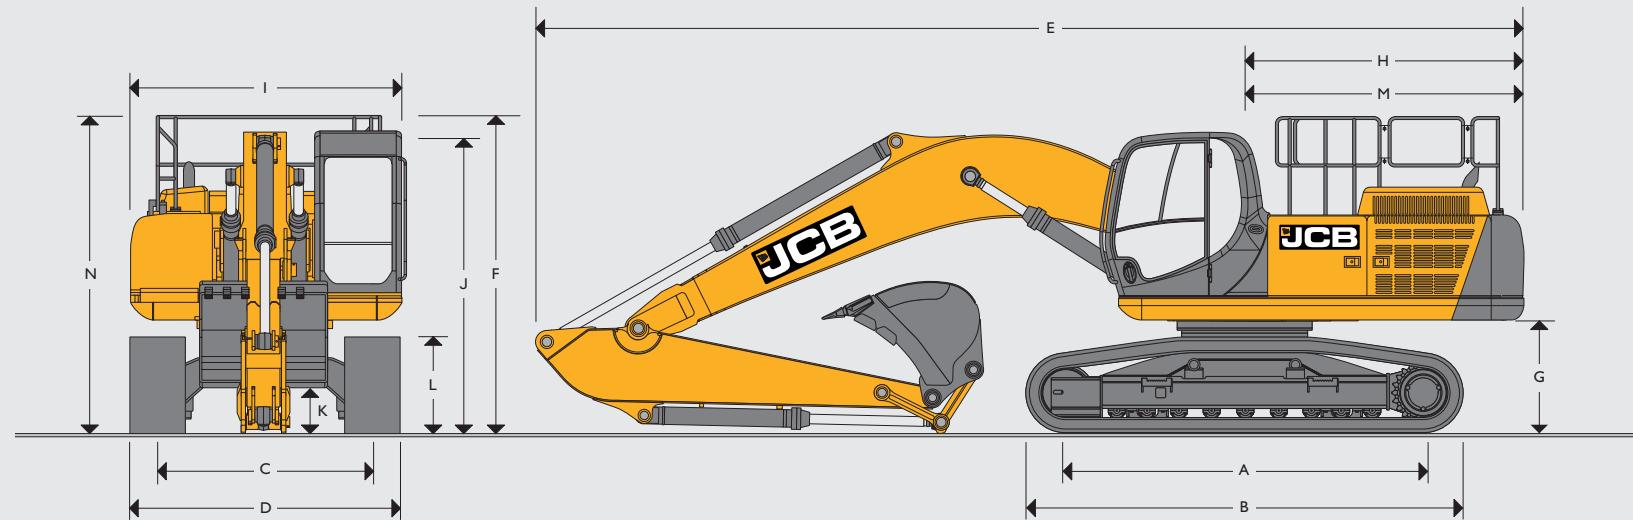

2 The global network of JCB Parts Centres is another model of efficiency; with 16 regional bases, we can deliver around 95% of all parts anywhere in the world within 24 hours. Our genuine JCB parts are designed to work in perfect harmony with your machine for optimum performance and productivity.

3 JCB Assetcare offers comprehensive extended warranties and service agreements, as well as service-only or repair and maintenance contracts. Irrespective of what you opt for, our maintenance teams around the world charge competitive labour rates, and offer non-obligation quotations as well as fast, efficient insurance repair work.

Note: JCB LIVELINK and JCB ASSETCARE may not be available in your region, so please check with your local dealer.

<b>ENGINE</b>		<b>TRACK DRIVE</b>	
Model	MTU 6R1000 Tier 4 Final compliant	Type	Fully hydrostatic, two speed with autoshift.
Type	Water cooled, 4-stroke, 6-cylinder in-line, common rail direct injection, turbocharged intercooled diesel.	Travel motors	Variable swash axial piston type, fully guarded within undercarriage frame.
Rated power (net)	180 kW (241hp) at 1800rpm.	Final drive	Planetary reduction, bolt-on sprockets.
Piston displacement	7.7 litres.	Service brake	Hydraulic counter balance valve to prevent overspeeding on gradients.
Air filtration	Dry element with secondary safety element and in-cab warning indicator.	Park brake	Disc type, spring applied, automatic hydraulic release.
Starting system	24 volt.	Gradeability	70% (35 deg) continuous.
Batteries	2 x 12 volt.	Travel speed	High – 4.6 km/h
Alternator	24 volt, 100 ampere.	Traction effort	Low – 2.7 km/h 221 kN
<b>SLEW SYSTEM</b>		<b>SERVICE CAPACITIES</b>	
Slew motor	Axial piston type.	Fuel tank	Litres 590
Slew brake	Hydraulic braking plus automatic spring applied disc type parking brake.	Engine coolant	Litres 39
Slew torque	100.3 kNm	Engine oil	Litres 25
Slew speed	9.4rpm	Swing reduction gear	Litres 16
Slew gear	Large diameter, internally toothed fully sealed grease bath lubricated.	Track reduction gear (each side)	Litres 5
<b>UNDERCARRIAGE</b>		Hydraulic system	Litres 430
Carriage options	LC - Long Carriage and NLC - Narrow Long Carriage.	Hydraulic tank	Litres 239
Construction	Fully welded, 'X' frame type with central bellyguard and sloping sidemembers with dirt relief holes under top rollers.	DEF fluid capacity	Litres 47
Recovery point	Front and rear.	<b>HYDRAULIC SYSTEM</b>	
Track shoe options	600mm, 700mm, 800mm, 900mm.	A variable flow negative control system with flow on demand, variable power output and servo operated, multi function open centre.	
Upper and lower rollers	Heat treated, sealed and lubricated.	Pumps	
Track adjustment	Grease cylinder type.	Main pumps	2 variable displacement axial piston type.
Track idler	Sealed and lubricated, with spring cushioned recoil.	Maximum flow	2 x 250 l/min
Track type	Sealed and lubricated.	Servo pump	Gear type.
No. of track guides	2 per side	Maximum flow	18l/min
No. of lower rollers (each side)	9 per side	<b>Control valve</b>	
No. of upper rollers (each side)	2 per side	A combined four and five spool control valve with auxiliary service spool as standard.	
No. of track shoes	50 per side	<b>Relief valve settings</b>	
		Boom/Arm/Bucket	343 bar
		With power boost	372 bar
		Swing circuit	290 bar
		Travel circuit	343 bar
		Pilot control	39 bar
<b>Filtration</b>		<b>In tank</b>	
		In tank	150 micron, suction strainer.
		Main return line	10 micron, glass fibre element.
		Pilot line	10 micron, paper element.
		Hydraulic hammer return	10 micron, reinforced microform element.

Lift capacity front and rear.

Lift capacity full circle.

Notes:

- Lifting capacities are based on ISO 10567, that is: 75% of minimum tipping load or 87% of hydraulic lift capacity, whichever is the less. Lifting capacities marked\* are based on hydraulic capacity.
- Lift capacities assume that the machine is on firm, level ground.
- Lift capacities may be limited by local regulations. Please refer to your dealer.

## LIFT CAPACITIES – Dipper length: 2.5m, Boom: 6.2m, Trackshoes: 700mm.

Lift capacity front and rear.

Lift capacity full circle.

Notes:

- Lifting capacities are based on ISO 10567, that is: 75% of minimum tipping load or 87% of hydraulic lift capacity, whichever is the less. Lifting capacities marked\* are based on hydraulic capacity.
- Lift capacities assume that the machine is on firm, level ground.
- Lift capacities may be limited by local regulations. Please refer to your dealer.

## LIFT CAPACITIES – Digger length: 2.5m, Boom: 6.2m, Trackshoes: 800mm.
